Teachers are continually searching for effective interventions to meet the needs of all students. There are wonderful evidence-based strategies you can use to engage struggling learners and support their mathematical thinking and understanding. Join this session and together we will explore the mathematical regions of the brain as you experience "hands-on/heads-on" learning, integrating theory and practical application towards math proficiency for all young math learners.

***Outcomes:*** *At the end of three hours, success will look, sound and feel like:*

- ♥ Knowing how to coach your students to use strategies for math understanding and retention.
- ♥ Renewed, re-energized, and revitalized from sharing a learning experience with your professional peers.
